SKILLS

- Programming Languages: C#, JavaScript, TypeScript
- Frameworks & Libraries: ASP.NET Core (.NET 6/7/8), ASP.NET MVC, Web API, Angular, React, WPF
- Backend & APIs: RESTful APIs, Microservices, Entity Framework, LINQ, API Security (JWT/OAuth)
- Databases: SQL Server, MongoDB, Stored Procedures, Database Optimization
- Cloud & DevOps: Azure App Services, Azure DevOps, CI/CD Pipelines
- Architecture & Best Practices: Clean Architecture, SOLID Principles, Design Patterns
- Tools & Collaboration: Git, GitHub, Bitbucket, Jira, Postman

LANGUAGES

English (Professional), Urdu (Native)

CERTIFICATIONS

Microsoft Certified: Azure Fundamentals
March 2024 - March 2026 10Pearls University

Software Engineer | Diploma November 2016 - November 2019 APTECH Computer Education

EDUCATION

Bachelor of Science Computer Science April 2024
Virtual University, Karachi

Senior Full Stack .NET Engineer with 6+ years of experience building scalable, high-performance enterprise web applications. Strong expertise in **ASP.NET Core, C#, RESTful APIs, SQL Server, and Azure Cloud**, delivering secure and maintainable solutions. Proven ability to own **end-to-end development**, lead critical modules, and translate complex business requirements into reliable technical implementations. Hands-on experience with **CI/CD pipelines using Azure DevOps and Jenkins**, ensuring smooth deployments and system stability. Skilled in **performance optimization, clean architecture, and enterprise-grade system design**.

EXPERIENCE

January 2023 - Current

Senior Software Engineer Enterprise64, Karachi

- Led modernization of a legacy VB.NET system to .NET 8 and Angular, significantly improving application performance, maintainability, and UI responsiveness.
- Designed and maintained high-performance RESTful APIs using ASP.NET Core; refactored complex SQL stored procedures into EF Core, improving scalability and reducing database coupling.
- Optimized SQL Server schemas, queries, and indexes, and collaborated in Agile teams to deliver stable releases with minimal production downtime.
- Architected scalable repository pattern with dependency injection, AutoMapper, and multi-database context support; background services, transaction monitoring, and print queue management.

November 2021 - January 2023

Senior Software Engineer Unity Foods Limited, Karachi

- Led development of large-scale enterprise applications supporting multiple internal departments, using ASP.NET Core, ASP.NET MVC, Web API, and SQL Server.
- Designed and integrated secure RESTful APIs connecting 5+ internal systems/modules, improving data consistency and cross-department workflows.
- Worked closely with business stakeholders to translate requirements into production-ready solutions, supporting hundreds of daily internal users.
- Managed and delivered 3–4 parallel projects simultaneously while consistently meeting strict deadlines and quality standards.

February 2021 - November 2021

Software Engineer Xtecsoft, Karachi

- Developed and maintained web applications using .NET Core, ASP.NET MVC, RESTful APIs, and SQL Server, supporting client-facing business solutions.
- Contributed to API-driven architectures, enabling reliable communication between front-end and back-end systems and improving overall application stability.
- Integrated Stripe Payment Gateway third-party APIs to extend application functionalities and improve user experiences, leveraging external services for enhanced capabilities.

November 2018 - January 2021

Asp.net MVC Web Developer *Slash Global International*, Karachi

- Contributed to full-stack development of business and client-facing web applications using ASP.NET MVC, C#, SQL Server, HTML, CSS, JavaScript, AJAX, and JSON, supporting multiple active client projects.
- Converted 10+ UI mockups into functional, responsive web pages, delivering a usable and consistent web presence aligned with business and brand requirements.
- Integrated Google Map third-party APIs to extend application functionality and support additional user services.

PROJECTS

Enterprise64 | LogixPro – Warehouse & Logistics Management System

Role: Senior Full Stack .NET Engineer

- Built and enhanced **enterprise-grade warehouse management modules** using **ASP.NET Core, C#, REST APIs, and SQL Server**, supporting high-volume order processing and logistics workflows.
- Designed and optimized **complex SQL queries and stored procedures**, improving performance and data accuracy across critical operations.

Sunridge Foods | E-commerce (Nov 2021)

Tech Stack: ASP.NET Core, C#, SQL Server, Azure, REST APIs

- Developed backend services for **online grocery and bakery ordering**, enabling real-time inventory and order management.
- Integrated customer, inventory, and order workflows to support a **hybrid online and physical retail business model**.

Revolutionize Digital Asset Management ioMoVo (2020)

Tech Stack: .NET Core, REST APIs, Cloud Services

- Contributed to an **Cloud Digital Asset Management (DAM) platform** used by global teams.
 - Implemented scalable backend services to **manage, secure, and optimize access to digital media assets**.
-
